

JOHN MEYERIN

patrick.meyerin@gmail.com | CITIZENABACUS.COM

OBJECTIVE

Seeking a position that is both challenging and rewarding working as a software architect or software engineer where I can use my experience with web service and microservice development.

QUALIFICATION

- Strong background in design and development of Web Services primarily utilizing Spring Boot or Micronaut
- Extensive software development background in developing real-time software utilizing Java, Groovy, JavaScript, and Kotlin
- Requirements analysis, design, modeling, development, test process design, and testing experience
- Using state-of-the-art methodologies to produce software solutions that meet the requirements and can be scaled effectively to more general problems
- Accustomed to all team formats, including leading, following, and working alone, as well as working with customers, end-users, and other developers

TECHNICAL SKILLS

Web Services & Web Application Software Systems

- Spring Boot (2 years)
- Micronaut (7 years)

Software Development Methodologies

- Object-Oriented Analysis and Design (OOAD), Unified Modeling Language (UML), and Design Patterns (20 years)
- Extensive training in Object-Oriented Technologies through military technical training and formal education (20 years)

Software Development Languages and Tools

- IntelliJ (7 years), Eclipse (2 years), Sun NetBeans (3 years), Visual Studio IDE's (1 year), DEV CPP - Bloodshed (<1 year)
- Java Platform (J2EE/JEE) (20 years)
- Visual Studio (1 year), C# (1 year), Web Services (12 years)
- Apache Maven (2 years), Gradle (8 years), Subversion (SVN) (2 years), Git (9 years), ANT (1 year)
- GNU C/C++ (1 year)
- Junit (9 years), Cucumber test suite (1 year)

Operating Systems

- **Unix/Linux:** Ubuntu (1 year)
- **Microsoft Windows** (20 years)

Database

- Microsoft SQL Server 2008 R2, Management Studio (SSMS) (2 years)
- Oracle10g (2 years)
- Microsoft Office Suite database (1 year)
- Postgres (6 years)

- Kafka SQL (1 years)

Messaging

- Java Message Service (1 year)
- RabbitMQ (1 year)
- Kafka (1 year)

EXPERIENCE

DEC 2023 – DEC 2024

Mastercard | O'Fallon, MO

Software Engineer

Primary Duties and Responsibilities:

- Microservice development

MAR 2015 – JUL 2023

Object Computing Inc | St Louis, MO

Microservices engineer, groovy, grails, and micronaut team

Primary Duties and Responsibilities:

- Web service development, primarily Micronaut

Additional Duties

- Build script creation

AUG 2014 – FEB 2015

Wellpoint | Wallingford, CT

Software Engineer

Primary Duties and Responsibilities

- Java Development for middle tier aggregation layer

Additional Duties

- Build script creation
- Database scripting

MAY 2013 – JUL 2014

SAIC | Scott AFB, IL

Software Engineer

Primary Duties and Responsibilities

- Java Development for UI and web services
- Testing and validation

Additional Duties

- Build script creation
- Database scripting

Accomplishments

- Accomplished over 50 individual task items
- Identified versioning issues in deployment environment to save release

NOV 2003 - MAY 2011

375 Communications Support Squadron | Scott AFB, IL

Application Development Supervisor

Primary Duties and Responsibilities

- Act as leader and mentor, providing guidance to subordinates
- Act as liaison with customers
- Oversee project development over entire life cycle
- Conduct training for junior developers
- Lead development both as manager and coder working in Java, JavaServer Pages, HTML, JavaScript, and ColdFusion

Additional Duties

- Provide command and control support for installation command during contingencies
- Perform military honors at funerals and other events
- Assist Security Forces prevent unauthorized access to the base

Accomplishments

- Identified inefficiency in event planning process, created automated solution that saved leaders an estimated 100 hours per month
- Spearheaded overhaul of Base Honor Guard's record management, updating the automated system to be both more user friendly and to comply with Privacy Act guidelines
- Created networked software solution for tracking network and communication maintenance work, streamlining logging of hundreds of maintenance actions
- Fortified ECM systems; eliminating high failure rate, provide vital convoy safety measures

EDUCATION

BS Computer Science 2013

BA Mathematics 2013

Mckendree University GPA – 3.2/4.0

Significant studies and projects

- Studied organization and architecture of computers. Used this to create single-operation processor using 4300-series logic gates and a breadboard
- Studied software networking, including network security. Leveraged this knowledge to lead team in creation of proxy server software
- Studied structure and design of compilers. Created compiler for made-up programming language
- Senior Project: Training neural net AIs via an analog of natural selection

Hypothesis: A population of simulated animals, given survival conditions, basic initial training, and an ability to produce offspring with similar animals will, over the course of several generations, demonstrate improved survival behavior.
